SWSS
Benchtop Wrapper

Model SWSS Benchtop Wrapper

The slim line Superwrapper is for use in bakeries, greengrocers, butchers, hospitals and all other food packaging areas.

The Superwrapper is a versatile and reliable method of displaying your goods to their best advantage. It is simple to use, requires very little maintenance and is always ready when you need it.

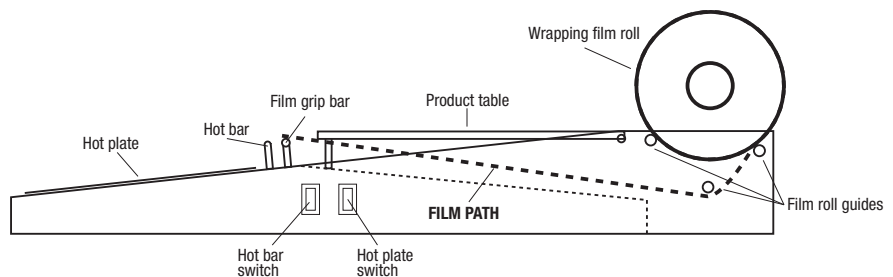

The Model SWSS Bench Wrapper wraps and heat seals foodstuffs in PVC food packaging film for customer convenience. A heated element bar (the Hot bar) instantly cuts the film at the required length. Where foodstuffs are being packed in trays the hot plate element heat shrinks the film to create a stronger seal.

- Plugs direct into any 240V Power outlet.
- Separate switches for hot plate and cutting.
- Internally fused for full protection.
- Stainless steel construction for food hygiene.
- 3 months warranty, full back up service, with all parts readily available.
- Easy to use.
- Minimises packaging time.
- Maximises output.
